

Subject Leader's Vision Statement

Barncroft Primary School believes it is our aim to prepare children with the skills and knowledge needed to be active participants in an ever changing digital world.

At the core of Computing is *computer science*, in which pupils are taught the principles of information and computation, how digital systems work, and how to put this knowledge to use through programming. Building on this knowledge and understanding, pupils are equipped to use *information technology* to create programs, systems and a range of content.

We will help the children of Barncroft Primary School to become digitally literate - able to use and express themselves and develop ideas through information technology - at a level suitable for the future workplace and as active participants in a digital world; leaving us as responsible, happy citizens.
