

Geography Subject Leader's Vision Statement

Our vision is that Geography learning will provide all children with the ability to delve deeper and make connections to find out about our world. We aim to inspire within our children a curiosity and fascination about the world and its people which will stay with them for the rest of their lives.

Our world is ever-changing and geographical enquiry needs to reflect the **dynamic** nature of people and places, with exploration being based on '**the real**' and **relevant**, wherever possible. Geography will help the children learn about how people influence and interact with the physical and human environment. Children will have access to a wide range of resources to aid them in their discoveries about the world.

A good geographer will:

- Ask lots of geographical questions about different places and people around the world.
- Suggest how different places have changed over time and how they may change in the future.
- Make connections between different people and places.
- Recognise and discuss different human and physical features around the world.
- Engage with different types of maps and practice different map skills.

Barncroft pupils should leave at the end of year 6 with an increased confidence and understanding of geographical facts and vocabulary, as well as the skills to explore their world and become responsible and valued citizens in our society.
