

## Computing Subject Leader's Vision Statement

Barncroft Primary School believes it is our aim to prepare children with the skills and knowledge needed to be active participants in an ever-changing digital world.

Computing is an integral part of everyday life and will play an immeasurable part in our children's futures. We at Barncroft Primary School will provide our children with the skills, creativity and enthusiasm to live and thrive in a world increasingly dependent on computing. Each child will be able to use the Internet in a safe and respectful way. They will understand the necessary precautions to take to stay safe and know where to seek help. Children will also utilise computing efficiently to enhance their learning of all subjects. To be good computer scientists, children will have the opportunity to write and debug code successfully and with confidence across different systems and devices.

We will facilitate the children at Barncroft Primary School to become digitally literate - able to use a range of media, express themselves and develop ideas through information technology – preparing them to become active, responsible citizens in a digital world.
